ABSTRACT

This bibliography presents a subject/author listing of 3,200 doctoral dissertations available from University Microfilms International (UMI). Publication dates range from 1950 to 1975, with a few earlier studies included. Each entry includes author, full title of study, degree earned, degree granting institution, date of degree, number of dissertation pages, reference to the 600-word abstract location in Dissertation Abstracts International by volume, issue, and page number, and an order number for acquiring a full text reproduction of the dissertation. Complete full text copy ordering information is included. (Author/MA)

for specific reference material you go to dissertations...

for specific dissertations you go to DATRIX II

More and more business and professional people—as well as students and faculty—are using dissertations in their research. Shouldn't you be using them too?

Now you can locate and acquire the dissertations you need quickly and easily with Datrix II. Datrix II is a computerized searching system: an efficient and economical way to find the right dissertations—fast!

Datrix II uses your carefully chosen 'keywords' in a computer search of the Comprehensive Dissertation Database which contains complete references to more than 600,000 dissertations. Master's theses can also be located through Datrix II.

Order a Datrix II search and within one week you'll receive a computer printout of up to 150 citations—all tailored to your search profile. Each citation includes complete bibliographic information, reference to the abstract location in Dissertation Abstracts International or Masters Abstracts and the order number for obtaining full text xerographic or microform copies of the dissertations and theses you need.

Datrix II is the most comprehensive source of dissertation listings, including those just recently published. And Datrix II is made even more practical by its low cost—only $15 prepaid for up to 150 references.

Request your Datrix II order form by writing to University Microfilms International or calling the Dissertations Hotline, (800) 521-3042. Complete Datrix II information and ordering instructions will be included with your order form.

DATRIX II: direct access to dissertations and theses on your subject.

Introduction

Dissertations in Science Education is a subject/author listing of 3200 doctoral studies available from University Microfilms International. Publication dates range from 1950 to 1976 with a few earlier studies included. The latest volume of *Dissertation Abstracts International* represented is 37/11 (May, 1977).

Titles in the bibliography were selected by Dr. Stanley Helgeson. He is Professor of Science Education and Associate Director for Science Education, ERIC Science, Mathematics and Environmental Education Information Analysis Center, The Ohio State University. The subject format was designed by Joan B. Peebles in cooperation with Dr. Helgeson.

Ordering Information

Ordering Information

Dissertations which are available from University Microfilms International are indicated by an order number at the end of the entry. When ordering dissertation copies from University Microfilms, include the order number, author's last name, complete title of dissertation, format and type of binding wanted, billing name and address, and shipping name and address.

In cases where no order number appears at the end of the entry, the dissertation is not available from University Microfilms. For further information, write to the institution granting the degree.

Prices

See a recent copy of *Dissertation Abstracts International*, or contact University Microfilms International, Eastern or Western Hemisphere Offices, for current pricing.

Xerographic Copies

Dissertations are reproduced xerographically at about 2/3 of original size, perfect bound and covered in paper. Clothbound copies are also available, with author and title stamped in gold on the spine. Unless you specify "cloth binding" in your order, you will be shipped and billed for the standard paper cover.

Pages are printed in numerical sequence by xerography. Since printing is on one side of a continuous web, the finished copy has printing on the right-hand pages only. Charts, graphs, line drawings and similar data reproduce quite well. For pages where halftones and continuous tone enlargements of higher quality are required, photographic prints can be made upon request.

Microform Copies

Dissertations can be ordered on 35mm positive (black on white) microfilm made at a reduction of 15-20X. 98-page format positive microfiche, at a reduction ratio of 24X, is available for titles with order numbers with a 76-, 77-, or 78-prefix.

Payment

Individuals must send check or money order with their orders. Institutions will be billed when their orders are shipped; they should order on their standard purchase order form, being sure to include the purchase order number and tax exempt number if applicable.

Addresses

Customers in the United States, Canada, Central and South America and the Caribbean should address dissertation orders and inquiries concerning the dissertation program to: Dissertation Publishing, University Microfilms International, P.O. Box 1764, Ann Arbor, Michigan 48106.

All other customers should direct their orders and inquiries to: University Microfilms International (Eastern Hemisphere), St. Johns Road, Tylers Green, Penn, Buckinghamshire, England.

University Microfilms International has taken the search out of research with three new, unique reference volumes on energy, career education and the North American Indians. Each volume is a separate, individual index of doctoral dissertations. And, each is a complete reference source within its own respective field. One, or all three can save hours of research and provide valuable assistance in probing the complexities of these subjects.

The entries in each volume are organized by key words or phrases which makes the volumes comprehensive, yet easy to use. For interdisciplinary researchers in government, industry and education these publications are the most vital sources available today . . . and tomorrow when kept up-to-date with the annual supplements. All entries give the location of an abstract in *Dissertation Abstracts International*, and information for ordering full text copies.

These volumes are a valuable addition for individual, public and private libraries, and government departments. The editions are library-bound and may be ordered as a set or on an individual basis.
